

# Writing a Print-Ready PDF from PageMaker 6.5 on the PC

Adobe PageMaker requires Acrobat Distiller. If you do not have Distiller installed on your computer, you will need to purchase it to create a PDF.

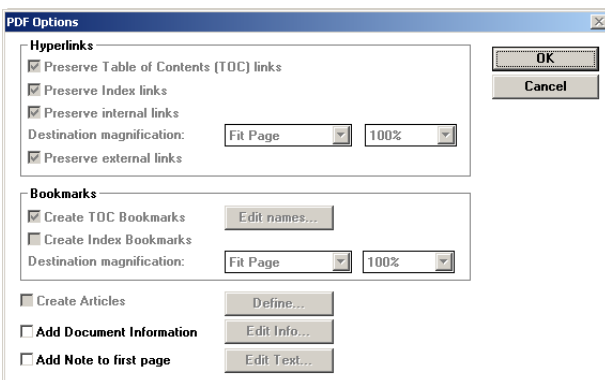

File Menu > Export > Adobe PDF...

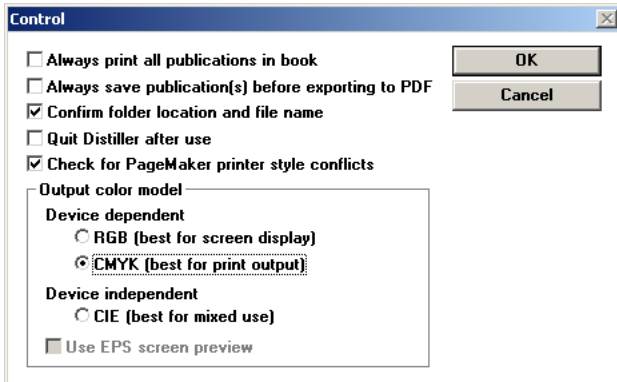

The first time you export as a PDF, PageMaker will ask you to locate Distiller.

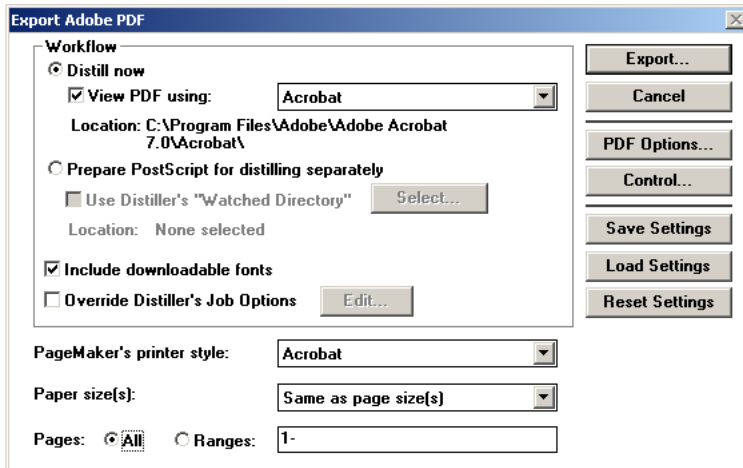

① Settings should reflect those shown to the left.

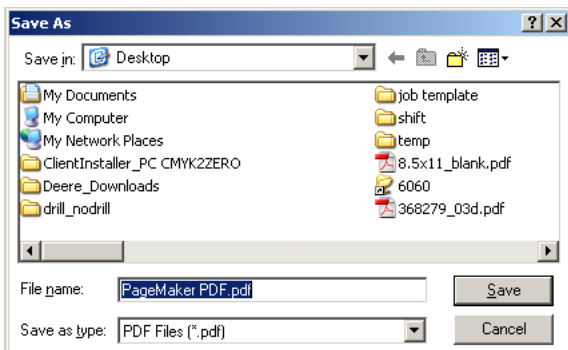

② PDF Options...

### 3 Control

### 4 Export...

### 5 Save As

Name the file and click Save
