Editor's Note: This list of leading digital book printers was compiled by the staff of *Book Business* and includes data from 2008 supplied by the printers that appear on the list. Despite *Book Business'* repeated attempts, several companies refused to divulge the requested information—most notably RR Donnelley and a number of privately held companies—and therefore, were not included on the list. If your company does not appear, but you would like to be considered for next year's list, contact msteinmetz@napco.com.
