**CCI's Digital Imaging Solution, ImageSilo®, Achieves SSAE 16 Certification**

*Digitech Systems Achieves SSAE 16 Certification: Underscoring the security and reliability of ImageSilo®, the world's most trusted Cloud ECM*

**HARTLAND, WI** (January 18, 2012) – CCI, a leader in print, digital imaging, eBusiness, and marketing solutions, announced today that its digital imaging software, provided by Digitech Systems, has achieved SSAE 16 certification.

On January 3, 2012, Digitech Systems Inc. announced that they have completed the American Institute of Certified Public Accountants' Statement on Standards for Attestation Engagements (SSAE) 16 audit. SSAE 16 became effective June 15, 2011 and replaces the Statement on Auditing Standards (SAS) 70 certification. The opinion issued was unqualified on the criteria described in Digitech Systems' assertion statement, demonstrating the company's commitment to and the establishment of well designed and executed control objectives and related processes and procedures for the cloud ECM service, ImageSilo.

SSAE 16 is the authoritative guidance that allows service organizations, such as cloud computing providers, to disclose their control activities and processes to their customers and their customers' auditors in a uniform reporting format. The SSAE 16 report includes comprehensive reviews and tests of Digitech Systems general computer controls. Federal regulations such as Sarbanes-Oxley, Gramm-Leach-Bliley and the Health Insurance Portability and Accountability Act (HIPAA) require corporations to audit the internal controls of their suppliers, including those that provide cloud services. By undergoing the SSAE 16 audit, Digitech Systems can provide its customers with a comprehensive audit report that facilitates compliance with these and other regulations.

John Gabriel, Digitech Systems CFO said, "The SSAE 16 certification verifies Digitech Systems' commitment to superior cloud services with controls and safeguards to protect the critical information we host for our customers." Digitech Systems retained the services of KPMG to perform the audit.

**About Digitech Systems, Inc.**

Digitech Systems, Inc. enables businesses of any size to more effectively and securely manage, retrieve and store corporate information of any kind using either PaperVision® Enterprise content management (ECM) software or the world's most trusted SaaS ECM service, ImageSilo. By significantly reducing the cost, Digitech Systems has moved ECM from a luxury convenience to an essential element for every well-managed business.

Digitech Systems continues to raise the standard of excellence in the ECM sector, as evidenced by the numerous awards they have received including the InfoWorld 100, CRN's Emerging Tech Dynamos and

multiple Nucleus Research ROI Awards. To learn more about the company's software and services that deliver any document, anywhere, anytime, visit [www.digitechsystems.com](http://www.digitechsystems.com).
